Forecast for Saturday 22 May 2021

Weather: Low cloud and light rain and drizzle will slowly clear through the night to become dry by mid-morning with sunny spells across the region. There will be plenty of sunny and dry weather through the day but isolated light showers will move south-eastwards through the region through the day until the evening.

Chance of cloud free mountain/hill tops above 600m: Less than 10% becoming 100% by lunchtime.

Visibility: Poor to start in cloud bases around 600m and rain, improving to be very good by mid-morning. Though in any showers through the day visibility will deteriorate temporarily.

Meteorologist's View

Pleasant through much of the day in the sunshine with moderate UV levels, though in the north-westerly wind it will remain chilly on exposed slopes and hill tops.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 21 May 2021	37.2mm	45.8mm	53.4mm

Forecast for Sunday 23 May 2021

Weather: Wet and windy weather will move eastwards through the region through the day, arriving in the west soon after dawn bringing cloud, rain and drizzle through the day. Strong winds through the day with gales over hill tops. Into the evening the rain will turn more persistent with heavier blustery bursts with a risk of thunderstorms.

Maximum wind: South-westerly 30mph with gusts up to 52mph.

Chance of cloud free mountain/hill tops above 600m: 100% dropping to 30% at times through the evening.

Visibility: Generally ok with cloud bases above hill tops but becoming very poor in periods of more persistent rain in the day and in heavier downpours in the later afternoon and evening as cloud bases drop to 400m at times.

Temperature: **Valleys:** Plus 7 Celsius.
At 600m: Plus 2 Celsius becoming Plus 5 Celsius.
Freezing level: 1000m.
